

hazardous substances, including organic compounds (poly aromatic hydrocarbons) and metals identified as Contaminants Of Potential Concern (COPCs) at the Wilcox Oil Company Superfund Site (Sites). Specific compounds include:

2-Methylnaphthalene
Benzo (ghi) perylene
Benzo (a) anthracene
Benzo (a) perylene
Benzo (a) pyrene
Benzo (b) fluoranthene
Chrysene
Fluoranthene
Indeno (123cd) pyrene
Phenanthrene
Pyrene

Arsenic
Barium
Chromium
Copper
Lead
Nickel
Thallium
Zinc

Investigations at the Site reported that wastes associated with this type of facility include crude oil, tank residues, brine, acid and caustic sludges, heavy metals, petroleum products, coke, sulfur compounds, and solvents.

XXXXXXXXXX

In the background section, add one sentence.

“Groundwater containing oily waste liquid of a hydrocarbon nature is currently leaching into drainage ditches and surface waters at the Site.”
